

OUT OF TOWN PATIENTS

Our practice is honored to receive patients from all over the world. We are proud to offer our services at a state-of-the art office and surgery center located close to the hub of Los Angeles International Airport. We are highly experienced in the process and privacy of coordinating all your domestic and international travel needs, for consultation and surgery services, and are eager to assist you.

Feel free to email Dr. Koplin with your concerns along with digital photos of the area(s) in question. He will evaluate your photos and discuss your concerns and desired results with you.

It would be helpful to provide information on previous surgeries, your medical history, medications you are presently taking, and your overall physical and emotional health. Dr. Koplin will recommend what procedures would most benefit you and whether or not additional procedures might be helpful to achieve your desired results. You will be informed about recovery time, risks and limitations associated with surgery.

If you wish to proceed, a few emails will take care of arranging your consultation and possible surgery appointments. We are happy to provide information regarding hotel accommodations, nurses to help you after surgery and specialty aftercare facilities, so that everything is settled before you arrive. When we see you in person, we will have paperwork prepared for you to review and complete. Dr. Koplin will perform a thorough examination and discuss everything in great detail in regards to your surgery.

The length of recovery time can vary for each procedure and patient. Dr. Koplin will discuss with you the appropriate time needed for your specific procedure. Our surgical coordinators will work with your schedule to make your postoperative visits as convenient and easy as possible.

Upon your return home we will continue to follow-up with you. We also ask that you keep in contact with us via email. If you return to Beverly Hills, please visit us again. We consider our patients to be part of our “extended family” and love to see you as often as possible!
